EDUCATION

Thadomal Shahani Engineering College

Bachelor of Engineering in Artificial Intelligence and Data Science

CGPA 9.47

2022-2026

EXPERIENCE

Fullstack Intern

June 2025 – July 2025

Augenblick Consulting

Remote

- Implemented Deep Zoom Technology, improving large image rendering speed and enabling seamless web-based navigation of gigapixel images.
- Contributed in building a RAG-powered system that converts RIS files into vector embeddings, enabling accurate research paper classification, tagging and advanced rule-based filtering.

AI Intern

January 2025 – April 2025

Nimrobo AI

Remote

- Created a tool enabling agentic AI to query and interpret CSV data using SQL for advanced data analysis and insights.
- Integrated citation tracking into AI Agent outputs, enhancing content credibility and reducing hallucinated outputs.
- Developed a container orchestration system that automatically spins up isolated AI agent instances with WebSocket access, and automated lifecycle management, improving scalability and reliability.

PROJECTS

CollabNext [↗](#) | *Next.js, TypeScript, Firebase, WebSocket, Yjs*

- Built a real-time collaborative content studio with WebSockets and Yjs CRDTs, ensuring conflict-free synchronization, and smooth multi-user editing across text editors, and whiteboards.
- Integrated AI pipelines for ghostwriting, comic/story generation, and sentiment analysis, reducing content creation time and accelerating editing pipeline for teams.

Simulation of Job Sequencing [↗](#) | *Python, C++*

- Implemented Genetic Algorithm and Simulated Annealing approaches to escape local optima and improve scheduling efficiency over baseline heuristics.
- Utilized C++ for high performance optimization implementing custom chromosome encoding, crossover mutation and annealing strategies to significantly reduce runtime and enable largescale benchmarking.

Wikipedia Graph [↗](#) | *Django, HTML, Plotly, Networkx*

- Developed an interactive graph visualization tool that maps the network of outgoing links between Wikipedia articles to reveal topic interconnections, featuring a Django backend for fetching, parsing, and storing article link structures in a relational database.
- Leveraged NetworkX for graph construction and analytics, integrated a Plotly-based frontend for exploration of link graphs.

ACHIEVEMENTS

Solved 400+ problems on **LeetCode** [↗](#) (Arrays, Trees, Graphs, Stack, Queues)

Winner of **6 Hackathons**, consistently excelling in fast-paced, high-stakes environments across diverse technical domains.

Achieved a **Perfect 10 CGPA** in 6th Semester.

TECHNICAL SKILLS

Languages: Python, C++, TypeScript, SQL, HTML

Core Skills: Object Oriented Programming, Multithreading, Computer Networks, DSA, DBMS, Operating System

Databases: MongoDB, PostgreSQL, MySQL, Firebase

Frameworks/Libraries: Next.js, Django, Node.js, Express.js, Tailwind CSS, NumPy, Pandas, PyTorch, LangChain

Tools/Platforms: Git, GitHub, Docker, Linux, Vercel
